Workshops and training
Reporting

Industry Skills

- Test Management
- Test Automation
- Defect Management
- Strategy
- Agile (Scrum)
- UAT Management

Profile & Experience

ISEB and Lean Six Sigma qualified Test Manager with 17+ years' experience working in a variety of industries including e-Commerce, Financial, Medical, Logistics and Media. Experience broken down as follows:

- 7 Years Test Management
- 2.5 Years Automation Specialist
- 2 Years UAT Management
- 2.5 Years Test Lead
- 1.5 Years Performance Testing
- 2 Years Functional Testing

Competent working within Agile environments (Scrum, Iterative Delivery) as well as more traditional methodologies (Waterfall, V-Model) used in SDLC's. Pragmatic, influential, enthusiastic, technical, possessing good communication skills and a can-do attitude.

Most Recent Position

Esure

TECHNICAL TEST LEAD

March 2018 – Present

Hands-on lead/management role, building a E2E test solution for a platform replacement using APIs and micro services. Responsibilities included:

- Authoring and implementation of Test Strategy for replacement motor quote solution (break apart the existing black box solution using micro services) hosted in AWS (Amazon Web Services)
- Creation of multiple automation frameworks for Selenium WebDriver (Java), WebLoad and UFT, providing autonomous data driven E2E testing and a continuous integration platform for development
- Construction of a SOAPUI test suite coupled with Groovy scripting for component test automation against multiple SOAP and REST endpoints
- Creating performance test matrix, running multiple data driven performance test cycles for load and stress testing via WebLoad
- Developing a stand-alone java application for building and anonymising test data to efficiently drive large quantities of tests that accurately represented genuine data
- Regular 'Show & Tell' demo's to senior stakeholders on testing activities
- Jira workflow configuration. Building workflows, triggers and post-functions for multiple issue types (Epics, User Stories, Bugs etc.) that reflects existing processes and workflows
- Attendance of daily stand-ups, providing user story updates
- Publishing of test documentation in Confluence (e.g. reports, burn-down graphs and real-time dashboard views)

More Extensive Experience - Career History & Certifications

LeasePlan

TECHNICAL TEST MANAGER

October 2015 – December 2017

Hands-On Technical Test Manager for multiple projects

- Authored/Implemented multiple test strategies for multiple projects (Salesforce, SAP, .NET and Web development)
- Onshore and offshore test management and team recruitment
- E2E build and implementation of data driven Selenium Webdriver frameworks (Java based)
- Deployment and customisation of Jira (local setup and configuration of the system, workflows, users, custom fields, bespoke issue types to represent business process and project requirements)
- Temporary Scrum master for 2 projects. Responsible for the management and prioritisation of backlog items and estimates (sprint-planning, poker planning, daily stand-up's and managing blocking issues through to resolution)
- Authored and executed performance tests for REST API web services + front-end web applications using WAPT (Web Application Performance Tester)
- Constructed XML data driven frameworks using SOAPUI for bulk test data load (Retrospective testing for business analytics)
- Sourcing, analysing and presenting test data to evidence a lack of quality assurance from a 3rd party software provider (Contractual obligations)
- Implemented and coordinated test solutions for 3rd party providers; cross-referencing of test strategies, gap analysis on test coverage, drafting implementation plans, test suites, defect triage, burndowns and reporting

TCC Global

UAT TEST MANAGER

January 2015 – August 2015

Planning, resourcing, execution and reporting for SIT and UAT

- Identifying, sourcing and managing UAT test resources
- Test Strategy, Plans and Scenario authoring
- System and business workflow generation to drive UAT scenarios from requirements through SIT
- Coordinating global SIT (System Integration Testing) with warehouses in China, Europe and Russia
- Provided UAT training, consisting of a two day workshop for identified SMEs and stakeholders
- Weekly reporting
- Stakeholder management
- Load and Performance testing of warehouse systems (high transactional volumes)
- Setup and configuration of Jira to track defects and change requests
- Defect management – hosting regular defect triage sessions, prioritisation of bugs to remove blockers (SIT & UAT)
